Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tajima et al. (PGPub 2004/0206570).

Deguchi shows a steer by wire system with a steering operator 3 electrically connected to road wheels 1 and drive means 5, 6, for steering the road wheels. Detecting means detect steering wheel position 4 of operator 3 and the steering position of steerable wheels (at 31, 32). Navigation device 51 includes a GPS receiver, memory, map, and gyro. The actual direction of travel is calculated by the navigation system. Signals from the detecting are input to a second angle of travel direction calculation means 105 to determine the target direction of travel. Control device 12 controls the drive means so that the actual steering direction corresponds to the target direction of travel, whether the navigation system is operational or not.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Laurent, Beck, Mattson, Meyers, Qiu, Mizutani, and Lu teach steering systems using navigation systems.

Pauley teaches a system that compares steering wheel angle with steered wheel angle.

Andonian, Stout and Yao teach steer by wire control systems.
